We can drive your transformation and increase your agility.** Thanks to our outsourcing solution, we ponder with you on the best solution to host your infrastructure; we manage and evolve your SAP services; then, you are able to focus on your real business challenges.

**PASàPAS** 

# Needs

## RESPONSIVENESS

To gain agility and efficiency, you want a real-time adjustment of your infrastructure and SAP services according to your real needs.

## INNOVATION

You want to boost innovation and your company's digital transformation and not only maintain your IS in operational conditions.

## PERFORMANCE

You need a totally reliable, efficient and secure information system that avoids obsolescence.

## OPTIMIZATION

You want to ease your IS management and optimize budgets with responsive and scalable tools adapted to your current needs.

## EFFICIENCY

Want to understand which hosting mode is best suited to your context? Wondering if the Cloud is ok for you? Which one and how?

## SIMPLICITY

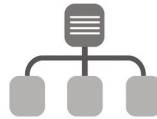

You are looking for simple and centralized management for all your hosting, infrastructure and SAP services issues.

# Solution

## SAP HOSTING

- Drive your roadmap towards the Cloud, in particular HANA Cloud.
- Hosting capacities in data centres in France and abroad, through strategic partnerships with sector leaders.
- Certified data centres that meet the requirements for security and data protection.
- High availability of our servers - reliable access to all your services and information system.
- Sustainable infrastructure: reliable, scalable, available.

## SAP MAINTENANCE

- Provide SAP experts to keep your SAP systems in operational condition.
- Manage your infrastructures: monitoring the availability of your SAP servers and applications, anticipating breakdowns and risk situations, detecting performance losses, history of actions on your IS ...
- Systems maintenance: anticipating and dealing with events before they become critical, managing anomalies and defects, evolving towards new functionalities ...

## SAP TRANSFORMATION

- Define your roadmap to the Cloud.
- Assist in Cloud adoption - Implementation.
- Migrate to S/4HANA platform as well as to SAP technology and Cloud solutions.
- Permanent transformation (OS DB - upgrade - unicode conversion ...).

# Benefits
